IDENTIFIERS *Illinois

ABSTRACT

All approved occupational programs in Illinois public community colleges are listed in this inventory, as well as the occupational programs to be implemented during 1982 through 1984. The occupational programs are listed according to Higher Education General Information Survey (HEGIS) numbers for the following program areas: business and commerce, data processing, health services and paramedical, mechanical and engineering, natural science, and public service related. In addition to indicating which colleges offer each of the programs, the inventory classifies the programs as: (1) district programs, which can be developed by any Illinois community college district if they are justified by employer demand, student interest, and available resources; (2) area programs, which are dependent upon the needs of a geographic area larger than a district; (3) regional programs, which serve a larger section of the state and are sufficiently specialized that no more than one would probably be approved for a region; (4) statewide programs, which are so specialized that only one or two would be approved in the state, but which would admit students from any district; and (5) cooperative programs, which are approved through contractual agreements with other institutions. If a program is proposed for implementation in the next 3 years, the projected date is indicated on the table.

INTRODUCTION

The "Statewide Inventory of Current and Intended Career Programs at Illinois Public Community Colleges" is a publication listing all approved career programs (Associate Degrees and Certificates) in Illinois public community colleges, and the proposed career programs projected to be implemented during the next three fiscal years (FY 1982 - FY 1984).

This information was collected from Table 4.3 of the FY 1982 Resource Allocation and Management Plan for Community Colleges (RAMP/CC) documents submitted by the individual districts in August 1980. The collection and compilation of the data for this inventory are two steps in the process of implementing Illinois Community College Board (ICCB) Policy #6.16 for statewide and regional planning of instructional programs. The objective of the statewide and regional planning concept is to strengthen communication and cooperation in program planning among local institutions. The statewide and regional planning activities were also designed to be supportive of cooperative contractual agreements which exist between and among institutions. It is our hope that the process will continue to stimulate the community colleges to recognize and consider the intent of neighboring institutions to initiate cooperative planning throughout the state. The ICCB staff has witnessed an increase of resolving programmatic conflicts at the local level, and information-sharing through the regional planning meetings is a primary contributor to this process.

The Illinois community college system is formally divided into regional districts for planning of new programs. The ICCB Office utilizes the Illinois Community College Trustees Association's regional designations as the regions for such program planning as shown on page iv.

The proposed programs are those projected for implementation in FY 1982, FY 1983, and FY 1984 and do not constitute commitments on the part of the ICCB for career program approval.

Dennis W. Howland
Assistant Director for
Career Education Services

Keith R. Lape
Associate Director for
Educational Program Services

DEFINITIONS OF ABBREVIATIONS

The definitions listed below are those approved by the ICCB, May 21, 1976, to be utilized in the statewide and regional classification for occupational programs in Illinois public community colleges. These have been supplied to provide an explanation of the abbreviations utilized throughout this document. The capital letter preceding the definition is used in the charts as the approved classification for that program.

D = DISTRICT PROGRAM -- A program which can be developed by each Illinois public community college district if justified by employer demand, student interest and available resources in the district.

A = AREA PROGRAM -- A program dependent upon the needs of a geographical area larger than a single district. The number of area programs in a region is based upon a number of factors, such as population centers, natural resources, location, industrial facilities, and manpower needs. An area program must allow space for students from other sections of the state. When program access cannot be obtained in neighboring community colleges and a definite need can be demonstrated, consideration is given for the approval of an area program by the ICCB.

R = REGIONAL PROGRAM -- A program serving a larger section of the state and so specialized that probably no more than one would be approved for a region. A regional program must provide space for students from any community college in the region, not just for the students in the district offering the program. Boundaries for the regions roughly coincide with boundaries of the Illinois Community College Trustees Association's planning regions. However, regional boundary lines are not used arbitrarily to exclude students, and a student's acceptance into a regional program is usually based on conditions relating to access, e.g., commuting time. Similarly, cooperative efforts between community college districts are not limited by arbitrary regional designations but are usually determined to favor student access.

S = STATEWIDE PROGRAM -- A program so specialized or unique that only one or two would be approved in the state. A program designated as a statewide program must allow space for students from all parts of the state, not just students in the district, region, or area offering the program.

C = COOPERATIVE PROGRAM -- A program approved to be offered through contractual agreement(s) with other institution(s) and limited by the specific arrangements agreed to in the contract; i.e., student access, equipment and facility use, and fees.

HEGIS = Higher Education General Information Survey
